Dear Parents,

The following science activity is not a "**must do**" activity/lesson, but is highly recommended. It compliments the "paper/pencil" science activities and razkids reading for this week.

This lesson does call for special supplies and materials that you may need to purchase. But, students can try to be creative and find other supplies at home to replace the ones from the lesson. **Even if the student does not follow up on the project, I think he or she should still listen to the audio/visual presentation.**

Step 1 Google: Mysteryscience.com

Step 2 Look under "School Closure Planning"

Step 3 Click on **second Grade**

Find this lesson:

Materials, Properites, and Engineering

Could you build a house out of paper?
